EFFICIENT STORAGE SYSTEMS

Storing and picking iron bars, piping, and raw materials in a safe and efficient matter is quite a challenge. Often, these items are stored on the ground where workers must go through a pile to get the material they need. To increase the level of safety and efficiency in your workspace, with proper inventory control, we offer you the Roll Out Cantilever Rack.

MODULARITY

- Adjust arms levels to your needs
- Add or remove arms
- Increase racking height
- Turn a single unit in to a double unit without wasting any parts.
- Easily add extra columns for longer material

BENEFITS

- Minimize unused space between arms levels
- Large weight capacity per level
- Reduce storage area by 50%
- Reduce handling time by up to 80%
- Enhance accessibility for overhead lifting on all levels.
